Introduction

Hello everyone!
The Objective of today's presentation is to create digital wireframes based upon the revised low-fi sketch GROUP UI prototype.

Scenario Steps of the Workflow

Here we are going to depict the workflow of how a user involves requesting a donation from our app.

1. **First, the user comes across the home screen, where he selects sign up for his donation.**
2. **He then fills his personal details and goes to the uploading docs screen.**
3. **After this he is redirected to the receiver's dashboard where he can check who has donated to him.**

Requirements

For Specific Requirements

I'm looking forward to take admission in a descent government college but due to my father's sudden demise. I'm unable to afford tution fees even after availing some government schemes. Please help me in continuing my studies.
