Introduction

Hello everyone!
The Objective of this assignment is to Develop a key sequence from scenarios into a visual story.

Project Title

Helping Hand

Problem Statement

Children are most struck in any natural disaster or pandemic like covid-19. Providing help to children who lost their parents in continuing their studies is the need of the hour, and this is where 'Helping Hand' steps in delivering aid.

Interaction Context

Our storyboard focuses on the journey of a high school/university student who needs financial aid to pursue his dreams of computer science and use our service to help him. The user can use our services using a mobile application or our web portal.

Who
Rohan is a 18 year student going in college

What
Looking to join a government college

Feeling anxious and worried

When
During admission process

Why
Financial burden

Interface Types

Our interface would be both mobile application and website based (GUI) and is relatively straightforward and would take the user through several steps to fulfill the user's request.

Story Board

Rohan's father died due to Covid-19, leaving his family without any source of income or life insurance.

Rohan had just passed his 12th standard and was looking to take admission in a decent government college a few months later. He gets worried on seeing the college admission fees.
He checks his remaining bank balance and to his dismay, it is nowhere close to be able to take admission in the college as all his family's savings were depleted after a few months with no source of income.
Rohan's friend tells him about an app called "A Helping Hand" that provides funding and other aid for children who've lost their parents due to Covid-19 and other natural disasters.
He thinks this could be a good way for him to take admission into the college, and continue his education which would not have been possible otherwise.

He decides to sign up for "A helping hand"

He seeks to register online. He is asked about whether he is here to get help or will he be providing help.

He is then asked to fill his personal details including name, age, contact, and email.

Rohan is asked to enter his mobile no. and he is asked to enter OTP sent to the number for verification.

He is need of financial aid. There are bunch of reasons for that. The first one is - there is no source of income since his mother is a housewife.

The second one being the fees of the college.

He is uploading the required documents citing his reasons.

After document verification he receives a mail guiding him about future procedures.

Bank details are asked for money transfer and further processing.

Due to lowering of his financial burden he can focus on his studies and can also opt for the tuitions he is in need.
